

CHARGED WITH ROTAX E10 THE LEADING E-POWERTRAIN MORE

EVERY REVOLUTION STARTS IN SILENCE.

At ROTAX, we've spent decades building engines that power champions. But passion alone can't protect karting from its current challenges: noise restrictions, regulatory pressure, and a new generation of consumers looking for an easier entry into the sport. The ROTAX E10 wasn't just built to race. It was built to move new customers differently.

PEAK ROTAX POWER

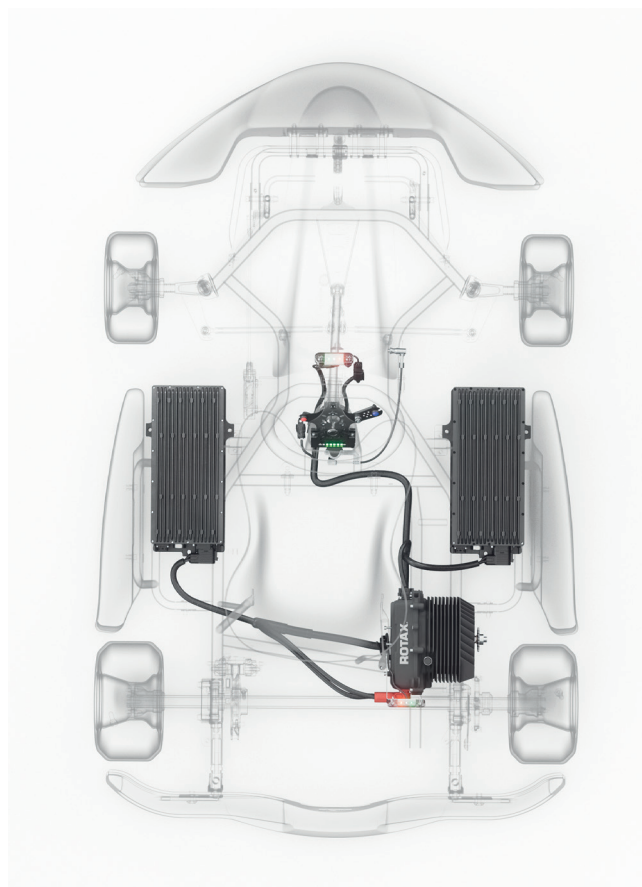

10.5 KW

INCREASED POWER WITH BOOST

40-60%

CHARGING TIME (10-80%)

34 MIN
